COMPLETING YOUR  
SURVEILLANCE  
SOLUTION

VIDEOINSIGHT®

A Panasonic Company

# Protect Your Assets and Minimise Risks with the Complete Surveillance Solution

**V**ideo Insight is the latest in surveillance technology integrating powerful enterprise VMS features, hardware optimisation and cost efficiency – all in one robust system.

- Advanced Video Management System with pure 64-bit capabilities
- Cost-efficient, easy-to-use surveillance solution
- Optimised hardware for endless scalability, unlimited client workstations, simple integration with legacy systems, centralised administration, failover server and more
- Optimal solution for law enforcement, commercial, education, logistics and transportation industries
- Advanced surveillance features eliminate uncertainty and improve response times
- No license necessary for Panasonic cameras made after October 2014
- Test functionality for up to 60 days – free

## Maximising Benefits for the User

### Easy Integration With Your Hardware

- Open architecture provides support for 5600+ camera models from 160+ manufacturers
- Provides easy integration with surveillance workflows
- Native Camera drivers integrated in software, making VI a truly open platform

### Easy Operation with User-friendly Interface

- Multi-environment client software allows user to monitor cameras remote on various platforms including Windows, Mac, Web browsers, IOS and Android
- Intuitive and efficient user interface with integrated user-friendly graphics for easy operation

# Enhanced Hardware & Software Capability

## Advanced bundled VMS features

Single management interface pre-installed with a wide range of features including:

- Automated Failover
- Virtualisation
- Panasonic NVR integration
- ROI (Region of Interest)
- Software Development Kit (SDK)
- Plug-ins: LPR and FacePRO™ / Face Detection
- Access Control Integration

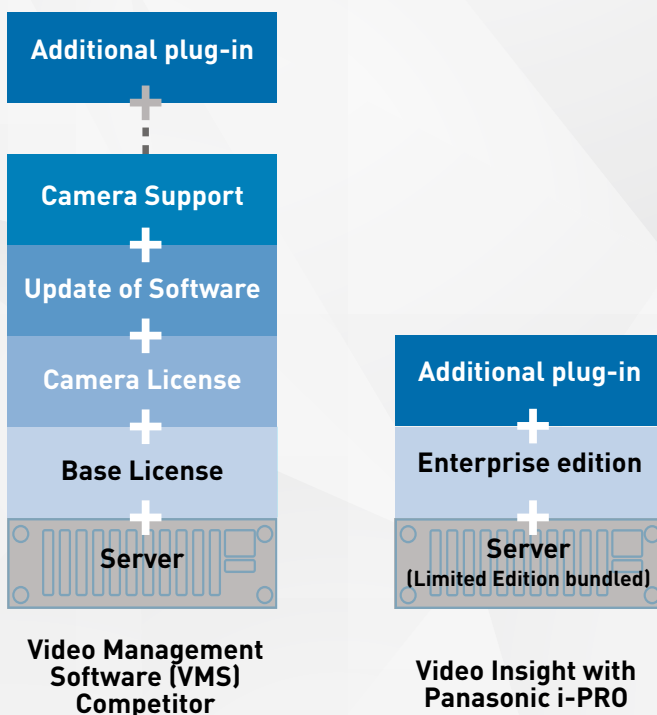

## Optimised hardware allows unlimited scalability

- Pure 64-bit system maximises hardware capability for increased efficiency across all system features
- Optimised hardware allows up to 300 cameras per server for an unlimited number of web clients and storage size
- Unlimited scaling possibilities in the surveillance workflow

## Optimisation & Cost Efficiency

### Surveillance is not cable TV, why pay for every channel you watch?

### Very low Total Cost of Ownership

- Bundled VMS features and i-PRO camera licenses in one complete system minimises costs
- No reoccurring annual maintenance fees, plus free updates
- FOC (Free of Charge) license available for up to 32 cameras (no plug-in support)\*1
- 60-day demo license includes 99 camera licenses (covers competitor brands)

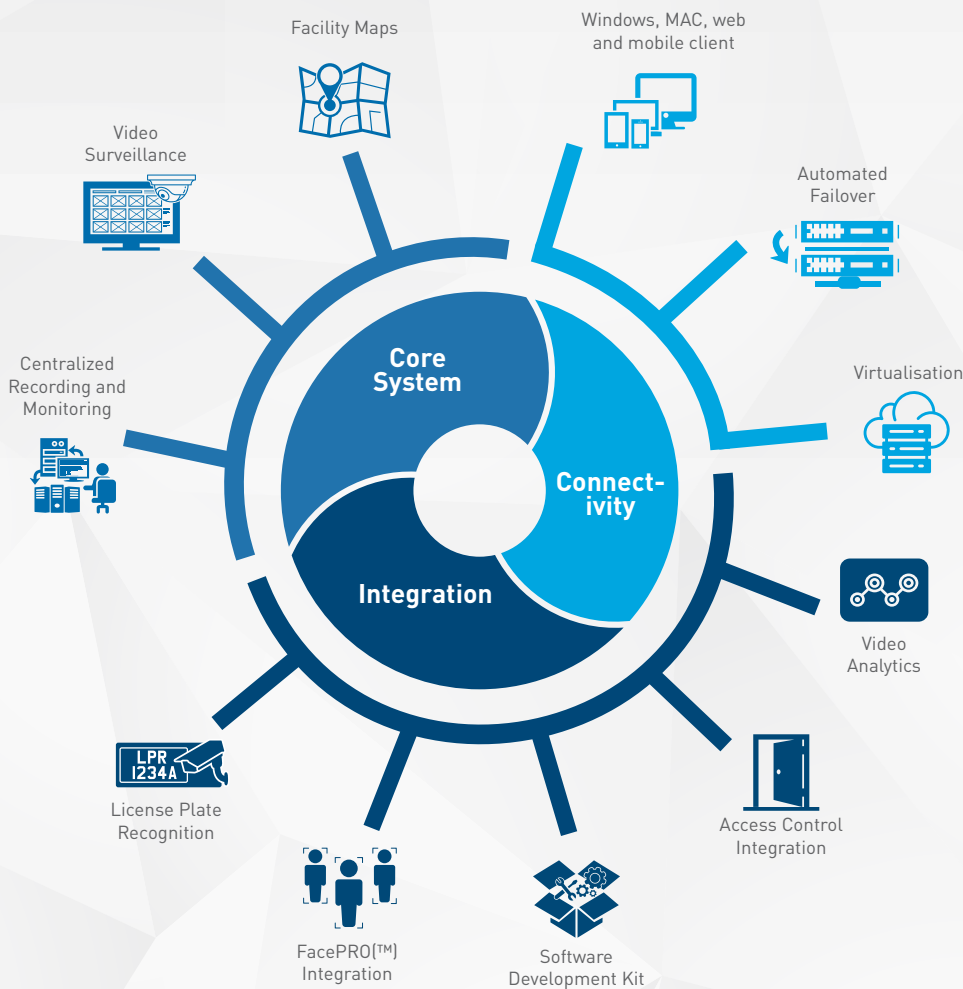

\*1 The express license is FOC. You can connect up to a maximum of 32 cameras, regardless of the brand. Panasonic Cameras newer than October 2014 do not require a channel license. However, all other cameras brands will require the 3rd party channel license.

# Surveillance Technology Never Stops Advancing

Panasonic Video Insight is a robust enterprise-class surveillance system built with the principles of efficiency and simplicity of operation in mind.

With a strong commitment to the security industry, Video Insight brings together powerful surveillance technology, advanced features, unmatched flexibility, an easy-to-use interface and low total cost of ownership – all in one single bundled system.

Be ready for the future of surveillance.

## IP Server

- Efficient 64-bit design supports up to 300 cameras/server (depending on recording condition)
- Designed for SME deployments – multi-server, multi-location
- Open platform allows easy integration
- MS SQL Express integrated
- Supports camera- and server-side motion detection
- Automated Failover
- Integrated with Active Directory and LDAP
- Support local and external storage solutions (NAS/SAN)
