CORRIGENDA / ADDENDUM

The following are corrections to mistakes in the Operating Instructions and additional new information.

Corrected areas
11.5.8 Configure the settings relating to the privacy zone ("Privacy zone" setup menu)
[Zone select]

Incorrect	Correct
Click [▼] of "Zone No" and select a zone number (1-8 or 1-32) from the pull-down menu. An asterisk (*) next to the zone number indicates that the privacy zone has already been set for the number. **A blinking mask will be displayed at the center of the image displayed on the [Image/Position] tab.** **Operate the camera with the panning/tilting/zooming operations to position the blinking mask over the area that you want to hide.**	Click [▼] of "Zone No" and select a zone number (1-8 or 1-32) from the pull-down menu. An asterisk (*) next to the zone number indicates that the privacy zone has already been set for the number. **The privacy zone will be set when an area is designated by dragging the mouse.**

Corrected areas
11.5.8 Configure the settings relating to the privacy zone ("Privacy zone" setup menu)
[Zone select]
> **Note**

Incorrect	Correct
▪ When selecting "Zone No" after selecting "Gray" for "Privacy zone", a mask will be displayed **at the center of the image display area** and will start blinking while changing its color as follows: Dark gray → Clear → Light gray	▪ When selecting "Zone No" after selecting "Gray" for "Privacy zone", a mask will be displayed **in the image display area** and will start blinking while changing its color as follows: Dark gray → Clear → Light gray
▪ When the "Number of Privacy zone" setting is changed from "32" to "8", privacy zones for zones numbers other than 1-8 are **deleted.**	▪ When the "Number of Privacy zone" setting is changed from "32" to "8", privacy zones for zone numbers other than 1-8 are **not displayed.**

Added areas
11.5.1 Configure the settings relating to image quality ("Image adjust" setup menu)
[Light control mode]
> **Note**

New Information
▪ When "Fix shutter" is selected, overexposure may occur in bright conditions (when there is 60,000 lx or more). In this case, increasing the shutter speed can reduce overexposure.

Added areas
11.5.3 Configure the settings relating to the preset positions ("Preset position" setup menu)
Register the preset positions
> **Note**

New Information
▪ When an image that has been turned upside-down by the digital flip function is registered as the preset position, it will be turned upside-down.
