New functions (Software V5.10)

Due to software upgrade, the following new functions have become available.

Details on the new functions

Reference pages

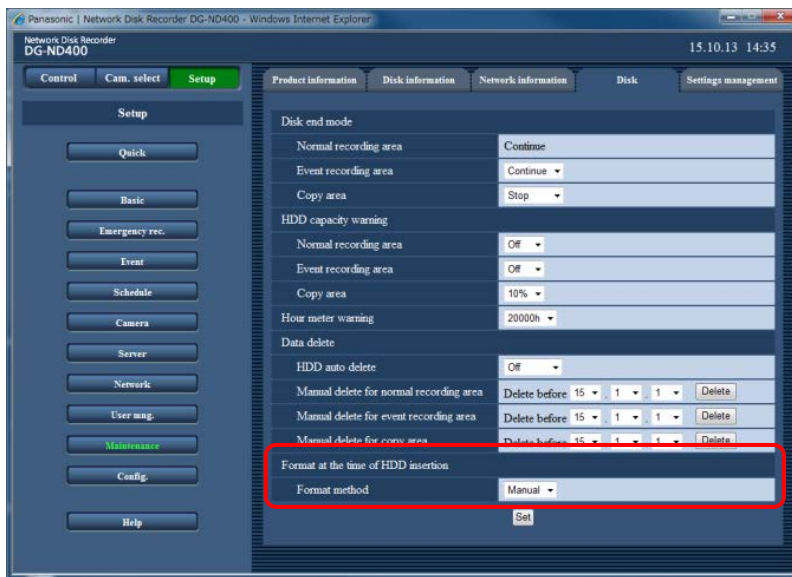

A function to select the HDD format mode from auto or manual is added.

Installation Guide
page 49, page 50

How to switch the format mode

The format mode can be switched in the "Maintenance" page.

1. Display the [Disk] tab in the "Maintenance" page.

Maintenance page - Disk tab

Setting items of the format mode

2. Select the format mode.
 - Manual : Asks the necessity of format every time when HDD is replaced.
 - Auto : Formatting will be automatically executed when HDD is replaced.
3. Click the [Set] button.

Note:

- The default setting is "Manual".
- When the software is upgraded, the default setting is also "Manual".

Details on the new functions	Reference pages
<p>How to check the format mode</p> <p>The format mode can be checked in the [Disk] tab of the "Maintenance" page (previous page). Also it can be checked in the LCD of the recorder. Follow the procedure below to check the format mode.</p> <ol style="list-style-type: none"> 1. Press the [▲] or [▼] button on the front panel to display the system information window on the LCD. <div data-bbox="221 530 635 629" data-label="Image"> <p>The image shows a green rectangular LCD display with the text "System Info" on the top line and "[SET]" on the bottom right.</p> </div> 2. Press the [SET] button to display the version information of the system. <div data-bbox="221 754 635 853" data-label="Image"> <p>The image shows a green rectangular LCD display with the text "Soft Version1" on the top line and "Ver. *. **" on the bottom line.</p> </div> 3. Press the [▲] or [▼] button to display the format mode window. <div data-bbox="221 983 635 1081" data-label="Image"> <p>The image shows a green rectangular LCD display with the text "FORMAT MODE" on the top line and "MANUAL" on the bottom line.</p> </div> <p style="text-align: center;">Manual mode</p> <div data-bbox="651 983 1064 1081" data-label="Image"> <p>The image shows a green rectangular LCD display with the text "FORMAT MODE" on the top line and "AUTO" on the bottom line.</p> </div> <p style="text-align: center;">Auto mode</p> 	

How to replace HDD when manual mode is selected

In the single mode, when the manual mode is selected for formatting, a prompt message to ask whether to format the disk will be displayed every time the HDD is added or replaced.

Also, the prompt message to ask whether to format the HDD will be displayed when the RAID mode is selected with the recorder or with the extension unit, or when a HDD is added.

1. To format the disk, select "YES" and press the [SET] button.
To cancel formatting, select "NO" and press the [SET] button.

FORMAT Single?
<NO/YES>

FORMAT RAID5?
<NO/YES>

FORMAT RAID6?
<NO/YES>

2. When "YES" is selected, the added HDD (in the RAID mode, the recorder or the extension unit) will be formatted.
When "NO" is selected, the operation will be proceeded.

Important:

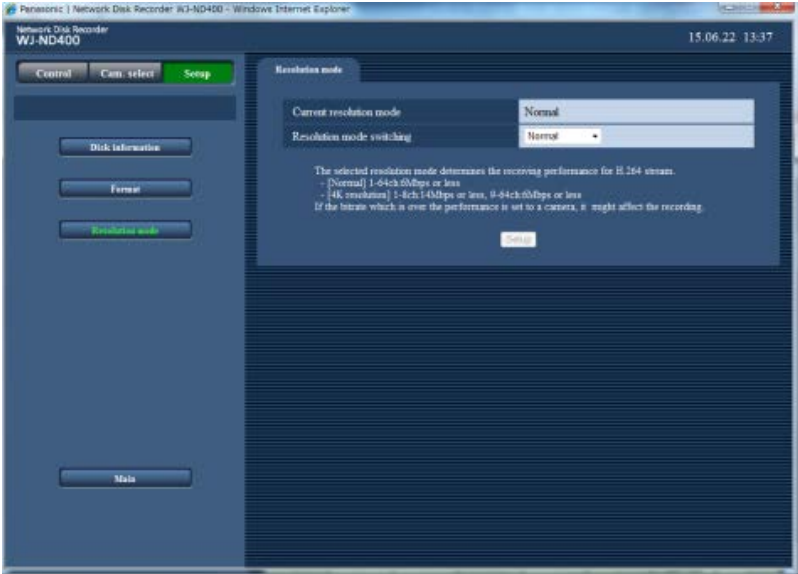

- According to the recorder's operation mode, the type of message to be displayed (Single/RAID5/RAID6) will vary.
- In the single mode, when "NO" is selected and the disk is not formatted, the prompt message to ask whether to format the disk will be displayed again when the power of the recorder is cycled.
- In the RAID5 or RAID6 mode, when "NO" is selected and the disk is not formatted, a message "INITIAL ERR" may be displayed on the LCD when the power of the recorder is cycled.
In this case, first perform the RAID initialization with the recorder or the extension unit that have not been formatted. Then, format the disk.
- When "NO" is selected, the unformatted HDD (in the RAID mode, the recorder or the extension unit) can be removed at any time.
- The remove error will occur when the HDD is removed while the format prompt message is displayed (before selecting "YES" or "NO").
Once again the HDD is inserted, the format prompt message will be displayed.

Note:

- When the format prompt message is displayed, a buzzer will sound per 1 second. The buzzer can be stopped by a button operation on the front panel.

New functions (Software V5.00)

Due to software upgrade, the following new functions have become available.

Details on the new functions	Reference pages
<p>Added a new mode, “4K resolution” mode, in which the bitrate that can display the live, record and playback is up to 14Mbps.</p> <hr/> <p>Important:</p> <ul style="list-style-type: none">• Only ch1 to ch8 in the “4K resolution” mode can support a bitrate up to 14Mbps.• The number of users who can login at the same time is reduced to 8 in the “4K resolution” mode. (16 users can login in the “Normal” mode.)• When playing images recorded over 6Mbps for the bitrate on a multi-screen with audio, interruption of audio might occur. <hr/> <p>Change the resolution mode</p> <p>It is possible to change the resolution mode on the disk configuration page.</p> <p>3. Click the [Resolution mode] button on the disk configuration page. The “Resolution mode” page will be displayed.</p>  <p>4. Select the resolution mode.</p> <ul style="list-style-type: none">• Normal : 1ch~64ch 6Mbps or less• 4K resolution : 1ch~8ch 14Mbps or less, 9ch~64ch 6Mbps or less <p>5. Click the [set] button.</p> <p>The confirmation window will be displayed. Click the [OK] button, the recorder will automatically reboot to validate the mode.</p>	<p>Setup Instructions page 86</p>

Details on the new functions	Reference pages
<p>Important:</p> <ul style="list-style-type: none"> The recorded image in the “4K resolution” mode cannot be played back properly in the “Normal” mode. <hr/> <p>Note:</p> <ul style="list-style-type: none"> A current resolution-mode setting will be displayed on the [Product information] tab page under “Maintenance”.  <p>The screenshot shows a web interface with a dark blue header containing the date and time '15.06.22 18:10'. Below the header is a navigation menu with tabs for 'Product information', 'Disk information', 'Network information', 'Disk', and 'Settings management'. The 'Product information' tab is active, showing a 'Current resolution mode' section with a dropdown menu set to 'Normal'. Below this is a 'Version information' section.</p>	
<p>During 1-screen display of live images of the camera on the web browser, the image will be displayed by dropping the frame temporarily, if drawing process is delayed depending on the load state or performance of the PC.</p>	<p>Operating Instructions page 29</p>
<p>During 1-screen playback on the web browser, the image will be played by slowing the playback speed temporarily, if drawing process is delayed depending on the load state or performance of the PC. At this time, audio will be muted.</p>	<p>Operating Instructions page 19</p>

New functions (Software V4.50)

Due to software upgrade, the following new functions have become available.

Details on the new functions	Reference pages
<p>Panasonic 9 megapixel network cameras can be used with the recorder.</p> <p>Note:</p> <ul style="list-style-type: none"> Refer to the "readme.txt" on the provided CD-ROM about the available cameras. <hr/> <p>Important:</p> <ul style="list-style-type: none"> When any of WQHD(2560x1440), 5M(2560x1920), 4M(2048x2048), 8M(2816x2816) and 9M(2992x2992) is selected for the image capture size of camera, display of live images on the monitor or the web browser may delay for approx.2 seconds. When any of WQHD(2560x1440), 5M(2560x1920), 4M(2048x2048), 8M(2816x2816) and 9M(2992x2992) is to be selected for the image capture size of camera for your operation, it is recommended to use a PC with one of the following CPUs to obtain the operational comfort. CPU: Intel® Core™ i7 4770 or faster Depending on the load state of the PC, live images from a camera may be displayed with some broken parts. However, this will not affect the recording. When over FHD (1920x1080) is to be selected for the image capture size, the images on a 4-screen of the browser will be displayed with the selected refresh interval. When displaying images with the aspect ratio of 1:1 on the main monitor or the browser, proportion of the displayed images will be kept regardless of the aspect ratio of the display screen. However, when sequence function is performed, the image will be displayed with the aspect ratio of the display screen. The bitrate that can display the live, record and playback is up to 6 Mbps. When the bitrate is set to over 6Mbps, there is a possibility that the live image may not be displayed properly or the recording may fail. The resolution should be below SXVGA(1280x960) or the bitrate should be less than 6Mbps to use SD memory backup. When over SXVGA(1280x960) or over 6Mbps are selected, SD memory backup may not be able to work properly. An alarm mail and a FTP transmission might not work normally, when the jpeg file size which is sent from a camera is 1 MB or more. It is possible to download up to 2 GB per download. 	-
