

## Monitor images on a tablet

It is possible to connect to the camera using a tablet via the Internet and monitor images from the camera on the screen of the tablet.

For further information, refer to our website

([https://i-pro.com/global/en/surveillance/training\\_support/support/technical\\_information](https://i-pro.com/global/en/surveillance/training_support/support/technical_information)).

Access to "http://IP address/" or "http://Host name registered in the DDNS server/" using a tablet.

### **Note:**

- It is necessary to configure the network settings of the tablet in advance to connect to the Internet and monitor images from the camera.
- Depending on the model of the tablet used, the screen displayed on the tablet may be the same as the screen displayed on a PC. In this case, access to "http://IP address/live/tab.html" or "http://Host name registered in the DDNS server/live/tab.html".
- There are some functions that cannot be used with a tablet. For further information, refer to our website ([https://i-pro.com/global/en/surveillance/training\\_support/support/technical\\_information](https://i-pro.com/global/en/surveillance/training_support/support/technical_information)).
